

Take control of a high-performing, non-acute supply chain with McKesson Business AnalyticsSM

Insight. Action. Results.

Without proper technology and expertise, it's nearly impossible to gather accurate, comprehensive data across all non-acute sites within a system. It's important to have resources that can bridge the data gaps, find opportunities and help you make solid business decisions within your health system.

With **McKesson Business Analytics**, we've created an interactive, easy-to-use solution to help you build a stronger, more resilient supply chain.

Turn data into action:

- Identify opportunities to reduce cost
- Understand ordering trends
- Estimate critical product inventory
- Access predictive emergency ordering and automation
- Find opportunities to help support improved compliance
- Evaluate product concentration by country or origin and manufacturer

Turn action into results:

- Mitigate risks through predictive emergency ordering
- Benchmark and rank facilities
- Balance and diversify product portfolio
- Reduce costs, redundancies and waste
- Minimize inventory disruptions
- Track progress on your scorecard
