Test Strips®

### Fast and Easy Urinary Tract Infection Test Used by Most Clinicians Over 94% Accuracy • Results in Just 2 Minutes

#### INTENDED USE

AZO Test Strips® are used as an aid in the screening of a Urinary Tract Infection (UTI). The urinary tract infection test strips are for the detection of Leukocytes (white blood cells) and Nitrite in urine.

#### PRINCIPLE

The test is a firm plastic strip with a clean grip handle onto which Leukocytes and Nitrite test pads are attached. If the test is positive, the Leukocytes test pad should be beige to dark purple, and the Nitrite test pad should be a uniform pink color.

#### TEST SENSITIVITY

Leukocytes (LEU) Nitrite (NIT)

REAGENT	READ TIME	DESCRIPTION
Leukocytes (LEU)	2 Minutes	Detects leukocytes as low as 10-15 white blood cells/μL.
Nitrite (NIT)	1 Minute	Detects nitrite levels as low as 0.075-0.1 mg/d

#### USE INSTRUCTIONS

Simply wet one test strip by holding it in urine stream for 1-2 seconds then wait required time to read.

#### Cautions

Certain medications can affect the color of your urine and affect test results.

If you take more than 500 mg of Vitamin C in 24 hours, you may obtain a false negative nitrite result.

The drug tetracycline may also cause a false negative leukocytes result.

#### Contraindications

Using during menses can produce false positives.

See package insert for complete use directions, storage, warnings and precautions.
