

Tools for a more effective and efficient clean

The proprietary Cintas microfiber program has been carefully developed to meet the unique needs of our healthcare customer.

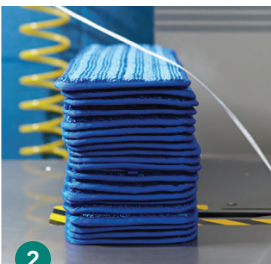

Unique processing and reliable delivery provide what you need to help keep your facility clean

- Soil separation throughout our process, from pick up to delivery
- Proprietary wash formula designed specifically for healthcare microfiber
- Hand inspection after each wash to ensure you receive quality mops
- Stacks of clean microfiber delivered on a cart allow for easy inventory control
- Trucks designed specifically to meet microfiber customer demands for:
 - High cleanliness standards
 - Efficiency of loading and unloading
 - Segregation between clean and soiled product

1

Microfiber washed separately from other textiles

2

Hand-inspection of microfiber to meet Cintas quality guidelines, then stacked and bundled in sets

3

Microfiber bundles stacked on a covered cart for transport

4

Microfiber delivered to facility in a truck specifically designed for healthcare customers

5

Clean empty totes delivered to the facility

6

Blue totes with soiled microfiber loaded onto truck for return to Cintas laundry facility
