

Earn Continuing Nurse Education Credits — FREE

Online courses developed by:

Supported by an ongoing CNE grant from Pampers Professional, dedicated to helping nurses provide the best care for babies.

Each course provides 1 contact hour of CNE credit upon completion.

Course Location:

Hot Topics in Neonatal Skin Care 2016 (ANN Webinar)

Presented by: Carolyn Lund, RN, MSN, FAAN

Choices for skin disinfection | Controversies with chlorhexidine gluconate bathing | New technologies related to medical adhesives | Medical devices that can cause development of pressure ulcers

academyonline.org/Lund

Neonatal Skin Health of the Diapered Area (ANN Webinar)

Presented by: Marty Visscher, PhD

Description and comparison of premature and full-term skin at birth and through the first months | Factors impacting diaper skin integrity and function vs. gestational age | Strategies for product use and assessment methods to prevent skin compromise and maintain skin health

academyonline.org/Visscher

Positioning the Neonate for Best Outcomes (NANN Monograph)

Presented by: Elizabeth Drake, CNS, MN, NNP-BC

Benefits of proper positioning | Goal of supportive positioning and positioning practices | Parent and family integration and partnership | Implications for providing individualized, supportive care

nann.org/positioning

How Science Improves Neonatal Skin Care in the NICU (NANN Webinar)

Presented by: Marty Visscher, PhD

Strategy to address skin issues that challenge nurses in routine care of premature and full-term NICU patients | Causes of skin compromise serve as basis for evidence-based approach for facilitating skin development and preventing and restoring skin damage

nann.org/skincare

Enlightening Nursing Practices for Neonatal Hyperbilirubinemia (ANN Webinar)

Presented by: Maureen Shogan, MN, RNC

Various screening tools for neonatal hyperbilirubinemia | Variations in neonatal phototherapy treatment devices | Parent teaching for neonatal hyperbilirubinemia

academyonline.org/Shogan

Every Interaction Matters: Integration of Developmental Care in the NICU (NANN Webinar)

Presented by: Kati Knudsen, PT, MPT, CNT, DCS, CLE

Identify key components of developmental care to support long-term outcomes in preterm infants | Strategies to promote brain and sensory development | Incorporating parents | Mitigation of pain and discomfort

nann.org/development
