

HOW TO EXPOSE DARK DATA IN YOUR ORGANIZATION

WHAT IS DARK DATA?

Dark Data is hiding deep within your databases, accounts payable systems, and even within your contracts with outside vendors. It's the things you can't see and don't know about. With our experience, there is usually more than what you think. But not until you truly shed light on the bigger picture of dark data, can you truly reduce financial leakage and start to prevent it from happening in the future.

THE EFFECTS

Hidden Control Gaps

Lost Revenue

Wasted Time Chasing Leads

Lost Opportunity

Knowledge is power. It is impossible to correct what is not known. Bringing light to Dark Data buried within disparate systems removes the unknown and obscurity.

EXPOSE

We will shine a light on the Dark Data, uncovering the control gaps and finding the lost revenue. Our SpendMend information factory will give you deep analytics and insight to improve your process and reduce future leakage.

Recovery

- Internal
- Vendor Self Reporting
- Post Audit

Compliance

- Disparate Systems
- Contract Management
- Process / Efficiency

Industry

- Vendor Attributes
- Best Practices
- Benchmarking
