

SPEND MEND

In today's intricate healthcare landscape, hospitals experience operational lapses and financial leakage due to breakdowns in processes and controls. The problem persists because hospitals and health systems face constant change while managing complex environments in an unending pursuit to remain compliant with internal controls and external regulations. Unfortunately, hospitals lose millions of dollars annually due to these common pressure points that are inherent to the healthcare industry.

SUITE OF SOLUTIONS

RECOVERY AUDIT

We partner with hospitals and apply decades of industry knowledge along with proprietary tools and expert personnel to perform the most thorough recovery audit in the healthcare industry.

MEDICAL DEVICE

Medical devices like pacemakers occasionally fail and must be replaced. SpendMend provides the markets only complete solution for managing a hospital's warranty program - starting with an audit assessment of current processes and policies to determine risk.

SALES & USE TAX

Determining taxability on purchased items and services within the healthcare industry can be a confusing and time-consuming effort. Our team is ready to take on the burden of navigating these extensive and ever-changing rules.

WIRELESS DEVICE

Management of handheld wireless devices and contracts is fraught with daily headaches and challenges. Our mobile device account management team can remove the burden and provide you with simple end-to-end management of your entire program.

PHARMACY AUDIT

Includes: Contract Price Verification & Contract Compliance Plus 340B Optimization
Which leverages price verification, contract compliance, utilization trends and more to help you avoid unnecessary costs. We utilize datasets, already supplied by your drug wholesalers, as well as the historical price files from the 340B program, a complete portfolio of GPO pricing, and more.
