HOW THE SERVICE WORKS

THE CINTAS WASH PROCESS

Cintas industrial laundry facilities follow a unique healthcare wash process developed in conjunction with our chemical provider WSI.

Wash Formula(s)

Cintas utilizes unique blends of powerful surfactants, enzymes and alkaline builders to physically remove/chemically destroy microorganisms that might be on the textiles¹

Mechanical Agitation

- Mechanical Agitation is very effective in physically removing bacteria/viruses from textiles²
- Cintas process has significantly greater mechanical agitation than home laundering³

Temperature

- Cintas utilizes wash temperatures between 100°–160°F²
- Uniform garments are subsequently subjected to temperatures in excess of 250°F in the dryer, steam tunnel, and presses, providing an additional level of sanitization through the thermal reduction and elimination of microorganisms³

PROTECTIVE APPAREL

Many physician's offices are taking additional steps to help protect their staff, patients and visitors with our non-surgical isolation gown services and rental face mask – which includes laundering and delivery.

NON-SURGICAL ISOLATION GOWNS

RENTAL FACE MASKS

Cintas' face masks have not been cleared or approved by the U.S. Food and Drug Administration (FDA). This product has been authorized by FDA under an Emergency Use Authorization (EUA) for use as source control by the general public as well as healthcare professionals in healthcare settings as to help prevent the spread of infection or illness during the COVID-19 pandemic. Cintas is marketing its face masks under the terms of this EUA, and its face masks are currently authorized for marketing by the FDA only for as long as the public health emergency remains in effect.

Cintas expressly disclaims all implied warranties including any implied warranty of merchantability or fitness for particular purpose. Further, Cintas makes no warranties, express or implied, that these masks prevent infection or the transmission of viruses or diseases or that the masks contain any antimicrobial, antiviral, or antipathogenic qualities. The masks should not be used (1) in any surgical setting or where significant exposure to liquid, bodily or other hazardous fluids, may be expected; (2) in a clinical setting where the infection risk level through inhalation exposure is high; or (3) in the presence of a high intensity heat source or flammable gas.

Pursuant to OSHA Regulations, 29 CFR 1910.132, an employer bears sole responsibility for selecting the type(s) of personal protective equipment to be used by its employees. All purchasers of personal protective equipment from Cintas bear full responsibility for selecting the PPE appropriate for use by their employees. Cintas expressly disclaims all implied warranties including any implied warranty of merchantability or fitness for a particular purpose. These gowns meet all standards for AAMI Level 1 non-surgical isolation gowns and are FDA Class I Exempt medical devices. These gowns are not recommended for use in surgical settings or where significant exposure to liquid bodily or other hazardous fluids may be expected or in a clinical setting where Level 2, 3, or 4 protection is required or warranted.

SURFACE DISINFECTANT SPRAY

Put your patients, visitors and staff at ease with a new service from Cintas: Surface Disinfectant Spray.

This on-site service consists of the application of a disinfectant that kills germs, bacteria and viruses, on identified common surfaces and touchpoints.

A trained Cintas technician will perform the service, applying disinfectant to surfaces you choose, such as flooring, furniture and doors as well as touchpoints such as light switches, doorknobs, handrails and work areas.

Customer is responsible for any pre-treatment cleaning of identified surfaces prior to application of disinfectant or sanitizer. Signet Neutral Disinfectant and Signet Three-Compartment Sink Sanitizer are for use on hard, non-porous surfaces. This information is not intended for and does not apply to residents of the following states: Maine, Montana, North Dakota, South Dakota, Tennessee, Vermont, West Virginia, or Alaska. The statements provided here should not be considered pesticidal claims in any jurisdiction not allowing such claims. Cintas makes no representation, guarantee or warranty regarding the reduction, prevention, or elimination of any particular bacteria, virus, microorganism, infectious agent, illness or disease.

CINTAS ULTRACLEAN® RESTROOM CLEANING

A thorough deep clean that removes soil and bacteria to leave your office clean and sanitized.

Sanitizes Surfaces

Uses a chemical that is formulated to clean surfaces while leaving a clean, pleasant scent

High-Pressure Cleaning

Removes build-up that brushes can't reach, and eliminates the need to touch contaminated surfaces

Removes Soil and Bacteria
