

# NON-SURGICAL ISOLATION GOWNS

STAY FOCUSED ON PROVIDING ATTENTIVE PATIENT CARE

## HOW THE PROGRAM WORKS

- 1. Scheduled arrival of isolation gowns to your facility.
- 2. SSR loads carts with ready-to-laundry gowns onto truck for return to Cintas laundry facility.
- 3. At Cintas facility, gowns are washed and dried separately from other textiles.
- 4. Gowns are bundled, poly-bagged and scanned for washed life history. Gowns that meet the manufacturer’s recommended life cycle are removed and destroyed.
- 5. Gown bundles are loaded on a cart for transport back to customer site.

## DAMAGED GOWNS

If you find a damaged gown that needs repaired or replaced, you can simply put your gown in an orange repair bag and place it in the soiled gown hamper. If there are no bags present, please let your Cintas service representative know and they will be happy to supply more at the facility.

## SERVICE QUESTIONS

Providing support for your Isolation Gown program is our priority, and we’re here to help whenever you need us. Just follow these communication steps for any questions or requests.

### STEP 1:

Your **Service Sales Representative (SSR)** who comes to your location every day is the best place to start with a question or request. You can also reach your SSR from the business card you received.

### STEP 2:

If you need additional support, you can also contact your local Cintas location and ask to speak to the **Customer Service Representative (CSR)**. You’ll find this contact information on your invoice. You can also reach out to Customer Service at **563.449.5555**.

### STEP 3:

Still need help? Just contact

Pursuant to OSHA Regulations, 29 CFR 1910.132, an employer bears sole responsibility for selecting the type(s) of personal protective equipment to be used by its employees. All purchasers of personal protective equipment from Cintas bear full responsibility for selecting the PPE appropriate for use by their employees. Cintas expressly disclaims all implied warranties including any implied warranty of merchantability or fitness for a particular purpose. These gowns meet all standards for AAMI Level 1 non-surgical isolation gowns and are FDA Class I Exempt medical devices. These gowns are not recommended for use in surgical settings or where significant exposure to liquid bodily or other hazardous fluids may be expected or in a clinical setting where Level 2, 3, or 4 protection is required or warranted.
