Visitor Management Built for Healthcare

Drive safety and compliance with a visitor management system that's simple for volunteers to use yet robust enough to gather data for your C-suite. With quick check-ins, customizable functionality and safety measures built-in, symplr Visitor Management is a vital part of your organization's holistic access management strategy.

Drive Safety and Compliance

- Quickly deny access when needed
- Set passwords and department visitor limits
- Cross-reference your vendor population to ensure compliance
- Send alerts on denied access activity

Access Dashboards & Reports

- Easily view visitors and vendors onsite from a single dashboard
- Filter dashboards to specific departments
- Quickly pull historical data for C-suite reporting or emergency response

Provide Patients Comfort, Quickly

- Check-ins under 30 seconds
- No logins needed for check-in portals
- Get visitors where they need to be – with their loved ones

Tailored to Your Needs

- Custom fields to highlight what's most important to you
- Customizable badge layouts
- Easy for clerical staff and volunteers
- Robust reporting for leadership
